

Fun, friendship and new adventures are what Girl Scouts is all about. Girls make new friends, challenge themselves, write their own stories, and take action to change the world for the better.

How? Through the Girl Scout Leadership Experience:

Science, technology, engineering, & math (STEM)

Through research-backed programming, the STEM Experience Center will provide girls, families, students, and the community access to hands-on STEM learning in a unique outdoor camp experience increasing not only female STEM interest, but also increasing the number of STEM professionals in Indiana.

Outdoors

At each of our five camp properties, girls enjoy the great outdoors, go swimming, hike, ride horses, and throw an axe! They make new friends and learn more about themselves than they ever thought possible.

Life Skills

Through badge and patch programs, girls learn and experience important life skills. Those include being a good neighbor, providing first aid, participating in civics and democracy, caring for friends or pets, being their best self, and much more.

Entrepreneurship

The Girl Scout Cookie Program is the largest girl-led entrepreneurial program for girls in the world. It allows them to give back to the causes they're most passionate about, fund unique adventures for themselves and their troops all year long, and transform into the bold and brave leaders that will make the world a better place.
